

Please read this manual before installation and operation.

⚠ Safety precautions

Do not disassemble or alter the lock.

Disassembling the door lock may damage the product. Damage to the product caused by unauthorised persons may void the warranty.

Please keep the product away from water or any

If the product is exposed to water or liquids, please wipe the moisture off with a soft cloth. If moisture or foreign materials penetrate the product, remove the batteries immediately.

Please check the batteries every 6 months for leaks/cleanliness.

If leakage is discovered, please wipe out with a dry cloth and replace with new batteries. In case of exposure to leakage, wash affected skin area with soap and water immediately.

Do not clean the product with fl ammable materials such as alcohol, benzene or thinners. Such materials may damage the surface of the lock or cause a fire.

Batteries should not be exposed directly to heat sources or submerged in water, because they may leak or explode, resulting in severe damage. Do not use damaged batteries.

Do not allow the battery electrodes to make contact with metals such as keys, as the battery may overheat, causing an explosion or severe

Please do not close the door with the deadbolt in the locked position.

It may damage the product or cause a malfunction.

Do not mix old and new batteries, or use different types of batteries

Ensure the + and - ends of the batteries are positioned correctly. Incorrect positioning may cause leaks and/or an explosion

Product features

3

Three way solution. (PIN code, Card / Fob, fingerprint)

able to use PIN code as well as Card / Fob and fingerprint

Voice guide and 3 step volume control system Voice guide (operation status, menu selection.) and provide 3 step volume control system.

A ↔ M automatic / manual locking set function Automatic and manual locking mode set is possible with simple switch operation from Inside.

Auto relock function

If users do not open the door after unlocking the device it will lock itself automatically.

Double lock functionWhen double lock function is activated, the door cannot be opened from the outside, even with the registered card, PIN code or fingerprint. Override key can still be used.

Mute function

Door will not emit any sound when mute is activated.

Battery level indicator and alarm for battery replacement

Easy to check battery status with three step level indicator and alarm when battery replacement is required.

Trespass alarm function

When the door is opened by force an alarm will sound.

Prevent trespass and hacking

After multiple incorrect attempted entries an alarm will sound and all the functions of the lock will be suspended for three minutes. The alarm activates after three incorrect PIN/card entries and five incorrect fingerprint entries.

Random security coding

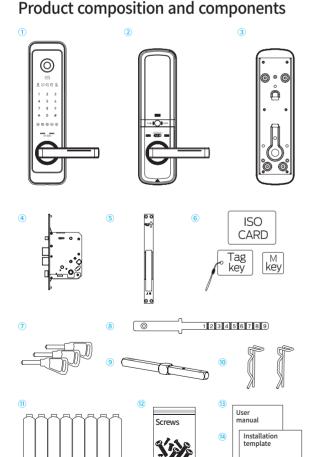

When you enter your home with other people, you may not want to show your PIN code to them. In this case, you may press any mbers randomly and then enter your PIN code at the end and you will still gain access.

6

Normal mode/safety mode Normal mode is ideal for new users or low security environments Safety mode provides a higher security level via use of a manager PIN code. Allows individual register and delete function which is not provided in normal mode.
